

Lightweight, shock-absorbing, and innovative...

NEW: nora® Lunatec combi Pro97

nora® Lunatec combi Pro97 is a modern, vulcanised outsole material with two layers.

The innovative **nora®** composite sheets for foot beddings and inserts have been setting standards for some years now for efficient work flows in orthopaedic shoe engineering. Two different materials are non-detachably joined during the manufacturing process and offer secure strength, *without any bonding*.

This innovative development is now also available in a high-quality outsole material. The vulcanised outsole material **nora® Lunatec combi Pro97** consists of a very abrasion-resistant and lightweight sole (approx. 45 Shore A) and a shock-absorbing cushioning layer (approx. 35 Shore A).

The proven material **Lunasoft** with the **profile 97 pastille** forms the basis of the treadsole of **nora® Lunatec combi Pro97**. The non-directional pastille profile of **nora®** is the classic among the lightweight and resilient soling materials for repairs and original outfit.

nora® Lunatec combi Pro97 is excellently suited for footbed sandals, comfortable shoes, and slippers. Without having to apply an additional cushioning layer, this material is ideal for processing as lightweight **continuous sole material**. It is also excellently suited for **buffer heels**. The cushioning sole and treadsole can be bonded in **one single step**.

nora® Lunatec combi Pro97 also offers quiet and dampened walking on hard floors. With an **overall thickness of 10mm**, the vulcanised cushioning layer guarantees a very light weight. It has a cushioning and shock-absorbing effect and protects the joints.

Properties and product benefits at a glance:

- Efficient processing in one single step
- No gluing required.
- Shock-absorbing and joint-protecting cushioning layer
- Extremely abrasion-resistant treadsole
- Non-directional brand profile
- Modern design
- Shock-absorbing walking

Treadsole: approx. 45 Shore A | 6 mm | Colour 81 black | Profile 97 pastille

Cushioning layer: approx. 35 Shore A | 4 mm | Colour 66 grey | Sanded back

Format: approx. 880 x 560 mm | **Total thickness:** 10 mm
